

TEF® HT

TEF® HT is a special, PTFE-based lubricant intended especially for lubrication of strongly heated chains, pinions, or tackles, as well as for all kinds of high-temperature applications. It does not contain silicone; it is usable for temperatures from -20 °C to +230 °C, up to 260 °C for a short time.

USAGE

TEF® HT penetrates even to the most inaccessible places where it creates a clean and very resistant film to eliminate wear of movable components. It is especially excellent for lubrication and protection of chains, chain rollers, pinions, ropes, pivots, chain wheels and slide planes in drying furnaces and kilns or tunnels. It is also very suitable for lubrication of chain conveyers in sterilization shops, painting shops, glass factories, thermal power stations and foundries, in the production of bricks, or in drink bottling plants. The product has an excellent oxidizing stability a lubricating capacity. It also provides for long-term life and prevent the occurrence of high-temperature deposits that are formed where mineral oils are used.

BENEFITS

- Excellent adhesion
- Thermal resistance from -20 °C to +230 °C, up to 260 °C for a short time • Prolongs lubrication intervals
- Protects against corrosion
- Excellent thermal stability
- Reduces friction and wear remarkably
- Resistance to water and pressure
- It does not contain silicone

USER MANUAL

1. Remove dirt and old lubricants from the surface to be treated (TECHNOSOL® is recommended).
2. Shake the tin thoroughly before use.
3. Apply at the distance of about 25 cm.

TECHNICAL DATA

Colour	light yellow
Solidification point	-45 °C
Ignition point	270 °C
Range of temperatures	-20 °C to 230 °C, up to 260 °C for a short time
Viscosity at 40 °C	about 190 mm ² /s
Viscosity at 100 °C	about 20 mm ² /s
